BEEVILLE, TX'S COMPREHENSIVE PLAN: A VISION FOR THE FUTURE

In 2021, the city of Beeville, TX, began drafting their Comprehensive Plan with enCodePlus' sister company, Kendig Keast Collaborative. The enCodePlus team helped design the plan for optimal online viewing by adding custom design elements that draw the reader's attention to important details and enhance the plan's readability.

The plan is divided into two parts: an Existing City report that provides background information on the city and a Future City component that lays out the goals and plans for the city's growth over the next 20 years. Both portions showcase enCodePlus' ability to display graphic elements. The Existing City report contains a variety of maps, charts, and graphs to help illustrate the statistics that form the basis for the city's projected growth and needs. The Future City component includes icons to call out goal categories, maps and photographs to help visualize projected improvements, and dynamic tables that lay out goals and proposed actions in an easy-to-follow manner.

Beeville's partnership with Kendig Keast Collaborative and enCodePlus helped them accomplish their goal of creating an attractive Comprehensive Plan that is easily accessible to everyone in their community.

enCodePlus handles graphics-intensive documents with ease! Incorporate maps, photos, drawings, custom icons, and more to keep your plans engaging.
